Version 1.0

# Introduction

An initial DEX offering, or IDO, is a new and exciting type of decentralized and permissionless crowdfunding mechanism, which is opening up an innovative way of fundraising in the crypto space. An IDO refers to a project launching a coin or token via a decentralized liquidity exchange. This is a type of crypto asset exchange that depends on liquidity pools where traders can swap tokens, including crypto coins and stablecoins.

IDOs are generally considered a fair way to launch a new cryptocurrency project by avoiding pre-mines, which is an issuance system that favors project founders over community members. Offering better and immediate liquidity at every price level due to its mechanics, IDOs are an excellent choice for new projects and startups keen to launch a token and access immediate funds.

**Worthpad is a decentralized, multi-chain IDO platform that will generate unlimited wealth for \$WORTH holders. \$WORTH is a reflection utility token that will act as the fuel for powering all the transactions in the Worthpad ecosystem.**

Worthpad has been designed with an automated liquidity generation smart contract that will give \$WORTH holders an opportunity to earn tokens of IDOs being launched on the Worthpad platform by staking \$WORTH. This minimises the risk of the retail investors and gives them a huge upside potential. They earn these new tokens passively without risking their capital. All the heavy lifting is done by the Worthpad ecosystem.

We are also building many innovative features in the Worthpad platform to prevent investors from losing their capital. The platform will have risk management features such as an insurance fund and staggered release of raised capital to projects when they meet defined milestones. This will ensure that the project owners do not overspend the capital raised or abandon their projects mid-way.

# Worthpad Ecosystem

Worthpad platform will comprise of the following building blocks:

## **\$WORTH Token**

\$WORTH automates liquidity acquisition for the Liquidity Pool and the Worth DVC Fund. This is funded by a 10% tax taken on each and every transaction.

Consequently, \$WORTH has a permanently increasing price floor. 50% of the tax goes to the Liquidity Pool and 50% goes to Worth DVC Fund. Every transaction makes \$WORTH more valuable.

## **Worth DVC Fund**

Worth DVC Fund is the unlimited wealth generation machine for investors who stake \$WORTH on the Worthpad platform. Our main goal is to improve the quality of millions of lives while simultaneously enabling a new funding source to innovation worldwide. Worth DVC Fund provides an opportunity to people all walks of life to safely grow their own capital. Worthpad will do all the heavy lifting for investors. Investors will enjoy the benefits of a professionally run VC fund by passively investing in \$WORTH.

## **Worth IDO Launchpad**

Worth IDO Launchpad will distribute the tokens received from IDO projects that are incubated and accelerated on the Worthpad IDO Launchpad to investors who stake \$WORTH. Worth IDO Launchpad will also collaborate with other launchpad platforms and invest money in disruptive projects being listed on those platforms. These tokens will also be distributed to investors who stake \$WORTH.

## **Worth Smart Contract Foundry**

Worth Smart Contract Foundry is the heart of the Worthpad ecosystem. It will enable secure, audited, quick and easy deployment of token launch smart contracts configured from a drag and drop interface. The code used for developing foundry smart contracts will be open source, battle tested and audited to ensure no exploits can be used by malicious actors to steal the investor funds.

# Worthpad Ecosystem

## Worth DEX

Worth DEX is a next-generation decentralized exchange being built on the Ethereum and Binance blockchains. It is designed to deliver all the advantages of a distributed platform, plus a user-friendly interface and liquidity that's comparable to centralized exchanges. Worth DEX is also building a DEX aggregator to give traders the best-adjusted price, a simple way to buy and sell assets at the best price possible across all DEX liquidity sources.

## Worth Insurance Treasury

Each project that uses Worth IDO Launchpad to raise capital will have to buy and lock \$WORTH in the Insurance Treasury to protect investors against potential project failure. Worth Insurance Treasury is the most critical risk management feature of the Worthpad platform to safeguard \$WORTH investors' interests. Our Insurance treasury has been established to protect investors of projects that fail as a result of team negligence.

## Fund Raise

We're looking to raise \$7,000,000 from Presale and Public Sale of \$WORTH tokens.

## Use of Sale Proceeds
